

Provider Pathway: Reduced Rates for Long-Term Care Services

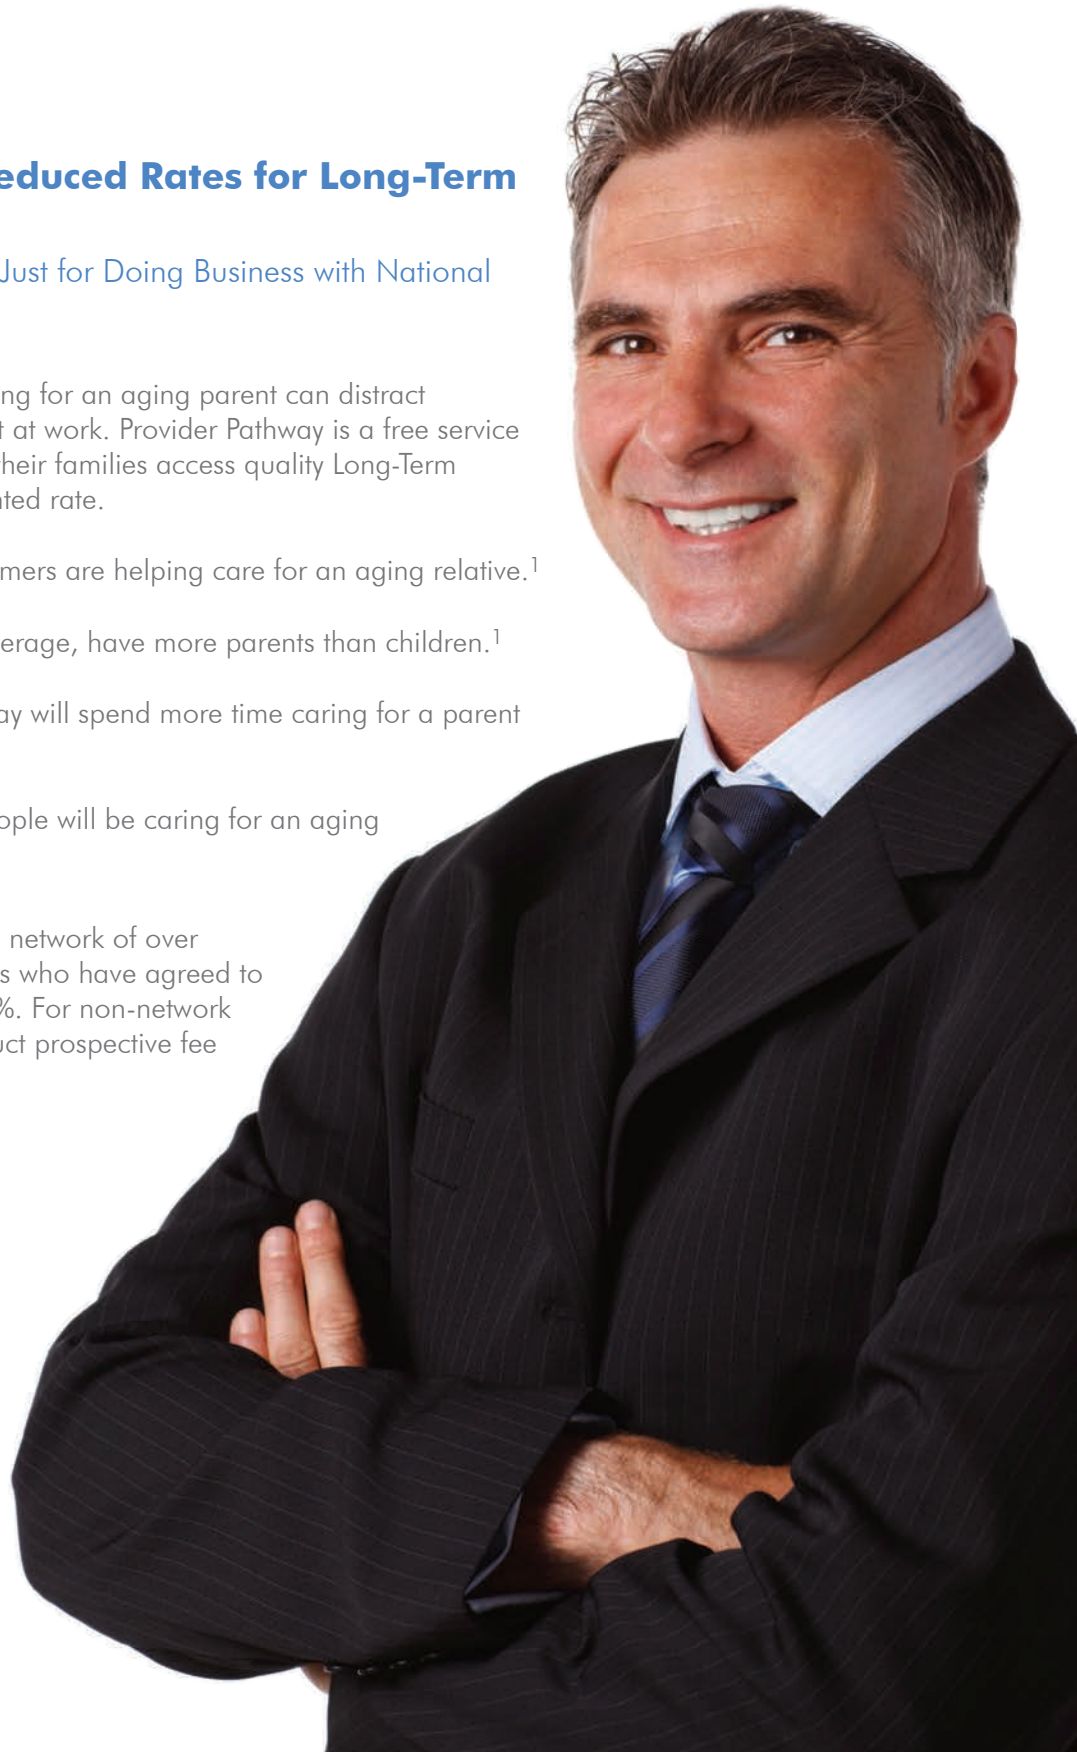

A Free, Value-Added Service Just for Doing Business with National Insurance Services

Worries about child care or caring for an aging parent can distract employees from doing their best at work. Provider Pathway is a free service that helps your employees and their families access quality Long-Term Care (LTC) services at a discounted rate.

- Four out of 10 baby boomers are helping care for an aging relative.¹
- American couples, on average, have more parents than children.¹
- The average woman today will spend more time caring for a parent than for a child.¹
- More than 60 million people will be caring for an aging parent by 2020.²

Provider Pathway has a national network of over 9,000 Long-Term Care providers who have agreed to discount their rates by up to 30%. For non-network providers, this service will conduct prospective fee negotiations upon request.
