

REDUCE BENEFIT COSTS BY REDUCING RISK

Vision Insurance Helps Employees While Helping Your Bottom Line

Many families neglect eye exams or other important preventative services. This neglect may leave serious health issues undetected.

Claims drive premium increases. The risks employees take – such as skipping vision and dental exams – may stimulate claims in other areas. Medical insurance, workers compensation and disability plans can all be affected. Ultimately, groups must reduce risk in order to reduce costs.

Voluntary plans are popular choices because there is no cost to the district. Give National Insurance Services a call. We offer a plan specifically designed for public-sector groups.
